Minimalist Style Air Diffusion Products

Why less is more

Why less is more.

Minimalism is playing an important role in the evolution of Australian architecture.

Today, more and more people prefer a minimalist style of design as it brings amazing benefits such as simplicity, elegance, and cleanliness.

There is nothing better than a simple, aesthetic design but achieving this is not that easy, especially when we are talking about air diffusion products. A minimalist piece may seem simple on a wall or ceiling, but a lot of experience, thought, practise and time is spent on development of such a product.

The QAE team is passionate about design. We understand that, at times, our customers put in a lot of effort into finding the right product that will reach its purest form without compromising its functionality. Unfortunately, what they are looking for, cannot always be found.

QAE always strives to meet and exceed our clients' expectations. That is why we decided to create QPRO ARCHITECTURAL solution for architects and designers chasing a modern, minimalist style of architecture.

QPRO ARCHITECTURAL – the complete line of minimalist style air diffusion décors precisely crafted beyond industry standards for your new project.
